

TYPHOON WX SERIES

WET DUST COLLECTORS

For the safe and efficient capture of aluminum dust

The Typhoon WX Series wet dust collector excels at capturing combustible/hazardous dust from your VIS-Polish. The blower draws air through VIS's proprietary water-tree baffle design, creating a cascading water effect that removes particles as small as 3 micron from the airstream. Dust is filtered through contact with water droplets and contained in the bottom of the collector for safe removal at necessary maintenance intervals. Water levels are automatically controlled with valves and sensors, including interlock functions to meet NFPA and OSHA codes.

NFPA 484 Compliant

In 2015, NFPA updated the 484 standard requiring an interlocked offline vent fan, to prevent build-up of hydrogen gas. Optional HEPA filters also now require a high temperature alert. CSA/UL certified control panel now supports:

- Offline Vent Fan included
- HEPA Filter high temperature alert (option)

100% Duty Cycle

The Typhoon WX collector's new ultrasonic water sensor monitors and automatically adds water as needed, even while the machine is in operation.

- Online adaptive water-level control
- Automatically adds water, offline & online
- Safety overflow drain

Benefits:

- Capture-at-source for Cleaner Air
- Complies with NFPA 484 (2019) Chapter 11

Features:

- Ultrasonic water level sensor
- NEMA 12 control panel w/LCD display
- Mainline Interlock Switch
- Anti-corrosion stainless steel #304 construction
- High efficiency, non-sparking blower wheel
- Transparent Lexan doors, with easy access clasps
- Low-cost mist eliminator afterfilters

Options

Ducted downdraft table in four standard sizes

WV-55 Sludge-Vac Removal Vacuum

High-efficiency Hepa Afterfilter kit (MERV 17)

Bag strainer system to remove dust and sludge

*Custom configurations available on request.
